

Context Clues

I had a word that puzzled me when I was reading. When the book stated that Savannah was in a state of sustained outrage, I tried to figure out what sustained meant. This was difficult to figure out, but I think it means steady or continuous, because she was very upset with the police for not accepting her evidence. I don't think she got over her anger. The clues I used were reading the surrounding sentences and looking for an example. I also tried to use it in a the same context but a different sentence. I looked up the word in the dictionary, and I was correct. It means steady.
