Science:

- *Complete Geographic Regions of GA

Social Studies:

- *British Colonial America
- *Natural, Human, Capital, & Entrepreneurship Resources

Thanks to everyone that supported the Rally Fundraiser this week! Tonight will be the last night of the Variety Show and it begins at 6:30pm.

On the afternoon of February 14th, we will celebrate Valentine's Day with a few activities and the students will swap Valentine cards. There are 22 students in our class. A class list is coming home today in Friday folders.

This week we have continued to learn about the regions of Georgia. We have discussed many of the plants, animals, and characteristics of each region. Students will begin writing their paragraphs about each region and creating their very own pop-up book!

A HUGE thank you to Dena Colburn and Michelle Thompson for making a pop-up book for each student

Please remember that Freckle.com is an excellent resource for students to practice reading and math skills on at home. Students can log in using their first name and last initial. The class code is eversj. Many have already been logging on at home for some extra practice! This is an excellent way to practice for the Milestone Test.

Please, please, please keep your child at home for at least 24 hours if they are running a fever, showing any signs of strep or the flu, or have been throwing up. It is going around quickly and I'm doing my best to keep our classroom as germ free as I can.

Classroom Needs: Construction paper, 4 bags of Valentine heart gummies (or the heart marshmallows will work too), 2 boxes of toothpicks (this is for our Valentine Day STEM activity) THANK YOU! THANK YOU!

Important Dates

- 1/31 & 2/1 - Variety Show
- 2/7 - STEM night
- 2/14 - Valentine Day card swap
